Veer Bharat Nyas OTT

Platform concept, pages and series plan

Swarndesh Media · October 2026

The Concept

Veer Bharat Nyas, an अधिष्ठान of the Culture Department, Government of Madhya Pradesh, is dedicated to research, fellowships and study of Bharat's long tradition: its heroes, thinkers, philosophers, rishis, saints, poets, writers, artists, scientists and entrepreneurs, from prehistory to the struggle against foreign rule.

The platform brings the Nyas's series, events, podcasts and books into one home of its own. It is free for everyone, supported by advertising that VBN controls, bilingual throughout, and open to verified creators and institutions. It streams from high-quality masters on the web and on mobile, with TV apps to follow.

Each series, its own world

Every series is different material, so each is presented on its own terms. Each is divided by its own natural unit (a महादेव, a river, a generation, a kaand), and its page is built around that unit. Selected series open into an interactive 3D world of their own.

An experience with depth

The interface uses depth as well as width and height: layered key art that moves with the viewer, scenes that come forward on focus, and smooth transitions from page to page. Browsing and playback stay light and fast, so the platform runs smoothly on ordinary phones and connections.

What sets it apart

- **VBN always in view.** The Veer Bharat Nyas logo stays in the header on every page and sits as a small mark in the corner of the video player, even in full screen.
- **Each series, its own world.** Series are explored through their own parts, and selected series through their own 3D worlds.
- **A home that follows the panchang.** The home screen follows the Vikram Samvat, the tithi and the festival calendar, bringing the right series forward on Mahashivratri, Ram Navami, Ganesh Chaturthi and other days.
- **Research alongside.** Every series has its own research material, presented beside its episodes.
- **Personalities.** Every rishi, saint, warrior, poet, thinker and scientist has a page with images, short videos and a brief introduction.
- **Listen mode.** Any episode plays as audio with the screen off.

- **Context layer.** A light tap mid-episode reveals the meaning of a Sanskrit term, or the background of a place or name.
- **Premieres.** New series arrive as scheduled premieres with a countdown and teaser.
- **Live events.** VBN's own events stream live, then stay on as permanent event pages.
- **Open to creators.** Verified creators and institutions publish in their own spaces.

Reach

- **Free for everyone.** No paywall and no sign-in needed to watch. An optional account saves progress, downloads and preferences.
- **Bilingual.** Every page in Hindi or English, one language at a time, with subtitles in Indian and diaspora languages to follow.
- **Every screen.** Desktop first, fully responsive on mobile, with apps for Android and iOS, and TV apps to follow.
- **Any connection.** Adaptive streaming from the high-quality masters down to a data-saver setting, with offline downloads.
- **Accessible by default.** Captions, adjustable text size, and navigation that older viewers find easy.

Why an owned platform

- **Ownership.** VBN owns its audience and its viewing data.
- **Revenue and control.** The advertising revenue is VBN's, and so is every decision about which ads run, where and when.
- **No distraction.** No recommendations that lead viewers away to other channels.
- **Connection.** The only place where VBN's series, events, podcasts and books come together.

YouTube stays useful as the free front door that brings people to the platform.

Platform Pages

Navigation

- **Desktop header.** VBN logo, then मुख्य पृष्ठ, शृंखलाएँ, गीता अमृत, पॉडकास्ट, आयोजन and प्रकाशन, with search, language, theme and profile on the right.
- **Mobile.** A top bar with the VBN logo, and a bottom bar with Home, Search, Events, Downloads and My Account.

On every page

- Hindi or English, one language at a time, switched with a toggle. No English placed beside Hindi as a translation.
- Light and dark themes.
- A mini player that keeps playing while the viewer browses.
- A footer with the Government of Madhya Pradesh logo, About, contact and legal links.

Viewer pages

- **Home.** A layered 3D hero cycling the series teasers; continue watching; गीता अमृत spotlight; all series; upcoming premiere; live or next event; latest podcasts; new books; personalities; featured creators; festival moments on the right days.
- **Series page.** One template, filled differently for each series: teaser in the hero; about the series; its parts in its own unit, with the episodes inside each part; a research tab; related personalities and books; and its 3D world where it has one.
- **गीता अमृत.** The series page with the Geeta mala, the life's questions, shlokas and the daily अमृत-सूत्र.
- **Episode player.** Chapters; the episode's research material; shloka read-along where the series has shlokas; listen mode; next episode; ad breaks; and the VBN mark in the corner.
- **All series.** The full catalogue, with upcoming series such as तपोधरा.
- **Podcast.** Editions by event, each with its episodes and guests.
- **Events.** Every event with its posters, photos and videos, arranged on a timeline with a switch to calendar view, and a page for each event.
- **Live.** The live player with the event schedule, or a countdown when nothing is live.

- **Premiere.** Countdown and teaser for an upcoming series.
- **Books (प्रकाशन).** The library and a page for each book. See Books.
- **Personalities.** An index and a page for each, with images, short videos, a brief introduction and related episodes.
- **Creators.** A directory of verified creators and institutions, and a channel page for each.
- **Search.** Results across series, episodes, books, events, personalities and creators.
- **About VBN.** The Nyas, its mandate, the Culture Department, and contact.

Account

- **Sign in.** Email, Google or Apple. No mobile OTP.
- **Create account.** Name, email, mobile, state or country, preferred language and interests.
- **Profile.** Watchlist, continue watching and history.
- **Downloads.** In the mobile apps.
- **Settings.** Language, theme, subtitles and notifications.

Creator side

- **Creator sign-up.** A separate path: individual or institution, identity and organisation details, portfolio, and agreement to the guidelines.
- **Creator studio.** Dashboard, upload with guided details, review status, channel settings and viewing figures.

Admin side

- **Review queue.** Approve or return contributions.
- **Content manager.** Series, parts, episodes, books, events and personalities.
- **Ad console.** Placements, scheduling, private ads and reports.
- **Live control.** Start a stream and trigger ad breaks.
- **Analytics.** Views, audience, countries and languages.

Supporting pages

Privacy and consent, terms, accessibility statement, page not found, and offline.

The Series

Eleven series and one upcoming. Each is divided by its own unit, and four open into 3D worlds in the first round. If they work well, the rest follow.

Series	Divided by	3D world in the first round
गीता अमृत	Life's questions, beginning with the Shrimad Bhagavad Geeta	The Geeta mala
महादेव	Each of the 84 महादेव, with several episodes each	Later round
महाकाल : सृष्टि का समय	One episode per character	Later round
महागाथा	Each avatar of Vishnu	Later round
युगयुगीन भारतवंशी	One episode per समुदाय	Later round
महाजनपद	Each janapada: Avantika (12 episodes), then Magadh	The janapadas on a 3D map
सदानीरा	Each river	Rivers across a 3D landscape
पूर्वज श्री राम के	Each generation	The generations as a 3D lineage
हमारे राम	Each kaand of the Ramayan	Later round
महागणाधिपति गणेश	One episode per form of Ganesh	Later round
Veer Bharat Podcast	Each event	Later round
तपोधरा	Upcoming	To follow

Flagship: गीता अमृत

गीता अमृत is the Nyas's most important current project and the heart of the platform: a creative effort to present the Sanatan tradition of knowledge in a modern visual language. Traditional sources speak of around 108 or more Geetas and dialogues of wisdom, and the Mahabharat alone holds many, with 18 Geeta-prasangs traditionally discussed. In every age, whenever people were in doubt about their purpose, their karma or the direction of their life, Bhagwan Shri Krishna gave knowledge through many forms and dialogues.

The series begins with the Shrimad Bhagavad Geeta and grows to include the wider tradition of Geeta dialogues. Each episode runs about 20 minutes, in Hindi with the original shlokas in Sanskrit, with a special focus on India's young generation.

The episode

- **Prashna.** A curious सूत्रधार opens with a question from today's life, without a ready answer.
- **Guru-shishya samvad.** The shishya voices today's unease, and the guru connects it to the Geeta and Sanatan thought.
- **AI cinematic visuals.** The idea is seen and felt, with a fixed character design for Shri Krishna and Arjun across the series.
- **Shloka, voice and music.** Sanskrit shlokas, Hindi voiceover and original music.
- **Vidwan.** A scholar or गीता-मर्मज्ञ gives the context, the meaning and its place in life today.
- **अमृत-सूत्र.** The सूत्रधार returns to the opening question with new sight, and the episode closes on a short अमृत-सूत्र.

On the platform, each part is a marked chapter in the player, so viewers can return to any part directly. Ad breaks fall between parts, never within them.

Browse by life's questions

The series is built on questions, so its home opens with them: अर्जुन का संशय, कर्म और फल, कर्तव्य, स्वधर्म, मन, क्रोध, मोह, भय, इच्छा, आसक्ति, सफलता-असफलता, समत्व, स्थितप्रज्ञता, आत्मा और शरीर, ज्ञान, भक्ति, अहंकार, त्याग, योग, जीवन का उद्देश्य, मृत्यु and कठिन समय में निर्णय. A viewer facing fear or anger today goes straight to the episode that speaks to it.

The Geeta mala in 3D

The Geetas of the tradition appear as a mala in three dimensions. The Shrimad Bhagavad Geeta is the first bead, lit at launch. The Geeta-prasangs of the Mahabharat and the other Geeta dialogues follow as the series grows, so the mala fills over time and shows the full scope of the project from the first day.

Shloka-level depth

- Shlokas with recitation and their meaning in the viewer's language.
- Read-along text synced to the recitation.
- A jump from any shloka to the moment it is discussed in the episode.

An अमृत-सूत्र every day

Every episode's अमृत-सूत्र is gathered on the platform. One opens the app each day, and each can be shared as a vertical card on WhatsApp and Instagram.

Short formats

The short formats made from each episode live on the platform too, in a vertical feed that leads into the full episode: अमृत-सूत्र, एक श्लोक एक विचार, आज का प्रश्न, गुरु-शिष्य संवाद के अंश, विद्वान से एक मिनट, AI Cinematic Gita and गीता और आज का जीवन.

A digital knowledge archive

गीता अमृत is meant to grow beyond a programme into a digital knowledge platform and archive: episodes, shlokas, scholars' explanations, guru-shishya dialogues, life's questions and AI cinematic stories, kept for generations to come. This platform is that home, with subtitles and dubbing carrying it from India to audiences around the world.

Launch

- **Pilot first.** A pilot episode tests the full format, and the series develops from what it shows.
- **Premiere on Geeta Jayanti.** Launch गीता अमृत, and ideally the platform with it, on Geeta Jayanti.
- **Listen anywhere.** Every episode is also available as audio for daily listening.

Series Plans

महादेव

The 84 महादेव and the story of creation and dissolution. Shiv not only as the lord of destruction but as the balance of creation, tapas, compassion and infinite consciousness.

Divided by: each of the 84 महादेव, with several episodes for each.

On the platform: the 84 महादेव as the series' parts; its 3D world follows in a later round.

Moments: Mahashivratri, and the month of Shravan.

महाकाल : सृष्टि का समय

The mystery of kaal, the origin of creation, the yuga cycle and cosmic order, drawn from Indian philosophy and the Puranas. Time not as mere counting, but as the root of creation, sustenance and change.

Divided by: one episode for each character.

On the platform: a character for each part, each opening its episode.

महागाथा

The gathas of the Vishnu Purana and other Puranas: creation, devas, dynasties and great characters, told through the avatars of Vishnu.

Divided by: each avatar of Vishnu.

On the platform: the avatars as the series' parts, in their order.

Moments: each avatar's jayanti.

युगयुगीन भारतवंशी

Documentaries on Bharatiya communities: the heroes, lineages and events that protected Bharat's civilisation, culture and self-respect across the ages.

Divided by: one episode for each समुदाय.

On the platform: each समुदाय as a part, so viewers in India and abroad can find their own community's story. Each community page is reviewed and approved by VBN before it goes live.

महाजनपद

The sixteen great states of ancient Bharat (अंग, मगध, काशी, कोशल, वत्स, अवंति, चेदि, कुरु, पांचाल, मत्स्य, शूरसेन, अश्मक, गांधार, कम्बोज, वज्जि and मल्ल): their rulers, culture and political systems.

Divided by: each janapada, beginning with Avantika (12 episodes), then Magadh.

3D world: the sixteen janapadas rising from a 3D map of ancient Bharat. Janapadas with episodes are lit and open their parts; the rest wait to be lit as the series grows.

सदानीरा

A journey through Bharat's sacred rivers and tirthas and the traditions around them. Rivers not as mere water, but as the ever-flowing current of civilisation, faith and life.

Divided by: each river.

3D world: the rivers flowing across a 3D landscape. Each river opens its episodes, placed along its course.

Moments: river parvas such as Ganga Dussehra.

पूर्वज श्री राम के

The Ikshvaku lineage from which Shri Ram was born: the kings, rishis and deeds that shaped the tradition of maryada, dharma, satya and ideal rule.

Divided by: each generation.

3D world: the generations as a 3D lineage rising toward Shri Ram. Each generation opens its episodes, and the lineage leads into हमारे राम.

हमारे राम

The life of Shri Ram from his birth, from Ayodhya to Rameshwaram and from vanvas to Ramrajya, explored through the Valmiki Ramayan, the Puranas, history and research. It asks whether Shri Ram is faith alone, or history too.

Divided by: each kaand of the Ramayan.

On the platform: the kaands as the series' parts, continuing from पूर्वज श्री राम के.

Moments: Ram Navami, Vivah Panchami, Deepawali.

महागणाधिपति गणेश

The divine form of Ganesh: his birth, leelas, forms and symbols. Not only the remover of obstacles, but the lord of wisdom, knowledge and every auspicious beginning.

Divided by: one episode for each form of Ganesh.

On the platform: each form as a part.

Moments: Ganesh Chaturthi, and Sankashti Chaturthi every month.

Veer Bharat Podcast

In-depth conversations with scholars, artists, theatre practitioners and researchers on the Mahabharat, Bharatiya civilisation, art and cultural traditions, recorded with the guests of VBN's own events.

Divided by: each event, with an edition and poster for each.

On the platform: editions by event, each linked to its event page; a page for each guest; full episodes in video and audio, with short clips for sharing.

तपोधरा

Upcoming. Shown in the catalogue as an upcoming series, with its plan to follow.

Creators and Institutions

The platform is VBN's, and it is also open to anyone creating serious work on Bharat's culture, history and spiritual tradition. VBN Originals always keep pride of place, and every contribution is verified before it is published.

Who can contribute

- **Creators.** Individual creators, influencers, filmmakers and scholars.
- **VBN fellows.** Fellows of the Nyas publish their research and films in their own spaces.
- **Institutions.** Universities, research bodies, museums and cultural organisations, including their archives.

Joining

- **Separate sign-up.** Individual or institution, identity and organisation details, portfolio, and agreement to the guidelines.
- **Identity check.** Every creator and institution is verified before their space opens.
- **Review by VBN.** An internal VBN team reviews every work before it goes live against published guidelines: accuracy, technical quality, copyright and content standards.

A space of their own

- **Channel page.** Each contributor gets a page with their banner, introduction, series and a verified mark.
- **Creator studio.** Upload, guided details, review status, channel settings and viewing figures.
- **Rights.** Contributors keep ownership and give VBN a non-exclusive licence.

Why creators will come

- **Themed open calls.** Invitations tied to the calendar and to VBN's series.
- **Featured placement.** The best work features on the home screen and in festival programming.
- **Commissions.** Outstanding creators can be commissioned for VBN projects.

Advertising

Advertising keeps the platform free for everyone. Ads can run across all series and every available space, and VBN decides when, where and what runs.

Sources

- **Private ads.** Sponsorships and campaigns sold directly by VBN, to brands, institutions and government departments. These take priority.
- **Ad networks.** Google Ad Manager as the central ad server, with Google and Meta ad networks and others filling the remaining space.

Formats

- **Video ads.** Before an episode and at break points within it.
- **Display ads.** On the home screen, series pages and event pages.
- **Series sponsorship.** A series presented by a sponsor, with a "सौजन्य से" credit.
- **Festival sponsorship.** Festival programmes and home screen takeovers on festival days.
- **Live ad breaks.** Inserted during VBN's live events at moments the production team chooses.

VBN in control

A VBN ad console, part of the platform's admin, gives the team full control:

- **Where.** Choose placements by series, episode, page or live event.
- **When.** Schedule campaigns by date and festival, and set exactly where the breaks fall within each episode.
- **What.** Approve every private ad before it runs, and block categories of network ads.
- **Who.** Target by language, region and device.
- **How often.** Set frequency caps so viewers don't see the same ad repeatedly.
- **Reports.** Impressions and revenue by series, placement and campaign.

Personalised advertising in India requires viewer consent under the Digital Personal Data Protection Act, so consent is built in from the start.

Events and Live

VBN's own events stream live on the platform, and only VBN's events. Every event keeps a permanent page with its posters, photos, videos, podcasts and recordings.

The events page

- **Timeline.** All events arranged in order, past and upcoming.
- **Calendar.** A switch to calendar view, following VBN's own calendar of events.
- **Event page.** Posters, photos and videos from the event, its podcasts, and the live stream when it is on.

How live works

- **At the venue.** Cameras and sound are mixed into a single programme feed with VBN's on-screen graphics.
- **To the cloud.** An encoder sends the feed over a dedicated internet line, with a backup connection, to a live streaming service.
- **To every screen.** The service prepares the stream in several qualities, and a global delivery network carries it to viewers. Each viewer's app picks the best quality their connection allows.
- **Ad breaks.** The production team triggers ad breaks at natural pauses in the event.
- **After the event.** The recording is saved automatically and goes on the event page.
- **Wider reach.** The same stream can go out to YouTube and Facebook at the same time, pointing viewers back to the platform.

Books

VBN publishes widely: research books, monographs, journals and collections. Many stand on their own rather than alongside a series, so the books have a library of their own.

The library

- **Every cover as designed.** Covers come in portrait, square and landscape formats, and the library shows each in its own shape.
- **Volumes together.** Books in parts, such as अमृत जलधारा भाग प्रथम to चतुर्थ, are grouped as one set.
- **Partners credited.** Co-publishing institutions, such as the M.P. Council of Science & Technology, appear with their books.

The book page

- Cover, title and description.
- Volumes in the set, where there are several.
- Partner institution, where there is one.
- Related series and episodes, where there are any.
- How to read or get the book.

Design Principles

- **Bilingual.** Every page in Hindi or English, one language at a time, switched with a toggle. No English placed beside Hindi as a translation.
- **VBN always in view.** The logo is visible on every page and in the player.
- **Modern and professional first.** Contemporary, polished and structured.
- **Depth.** Layered, three-dimensional motion and transitions, with 3D worlds for selected series.
- **Easy on the eye.** An experience viewers do not forget.
- **No em dashes.**
- **No emojis.**
- **No boxy design.**
- **No common AI components.** No dot pills, no eyebrow text, no boxes with a coloured left border.

Open Decisions

- The platform's name.
- The incentive model for creators.
- Which Geeta dialogues follow the Shrimad Bhagavad Geeta in गीता अमृत.
- Whether VBN publishes a companion text for गीता अमृत.
- Whether books are readable inside the platform or shown with a link to get them.
- The concept for तपोधरा.
- Which series get 3D worlds after the first round.
- The order in which subtitle languages are added.

To confirm with the Culture Department

- Security audit requirements before launch.
- Hosting of data within India.
- Accessibility standards for government platforms (GIGW).
- Approval for running advertising on the platform.
